A&B Computing is constantly on the look-out for well-written articles and programs for publication. If you feel that your efforts meet our standards, please feel free to submit your work to us for consideration for publication.

All submitted material should be printed or typed, double spaced. Any programs submitted should be listed (55 character width emphasised if possible). A cassette of the program alone will not be considered. All programs must come complete with a full explanation of the operation, and where relevant, the structure. We also require the program in machine readable form (cassette, 40 track 5 1/4", or 3" disc) plus any suitable screen photographs, printer dumps and so on.

All submissions will be acknowledged and the copyright in such works which will pass to Argus Specialist Publications Limited will be paid for at competitive rates. All work for consideration should be sent to the Editor at our Golden Square address.

## NEXT MONTH

Don't miss Xanadu, the first adventure to be born within Adventurescape, the adventure generator listed in our July issue. It's a fascinating challenge and, if you choose to imagine, design and produce your own adventure you could win an Electron as well as being honoured within our pages.

Dragonworld will win you over, Touchtech, the touchscreen, will demand your interest and Feedback will keep you informed.

Down to Earth is an equally inspiring follow up to Global View and there is a whole host of reviews, of hardware, firmware and software. Don't miss it.
